THE LESS YOU BURN THE MORE YOU EARN

**How our energy experts
can help your business save
money and energy**

Calling all small to medium businesses located in the Greater Lincolnshire area! We offer free advice and support to help your business to become more energy efficient. Alongside this, you could be eligible for grant funding from our Smart Energy Greater Lincolnshire programme.

We are helping businesses to make simple changes to save them money on their energy bills and reduce carbon emissions. Our programme offers a wide range of bespoke support from grants to free advice, onsite audits and workshops with networking opportunities, depending on what your business needs.

We are making a huge difference! But don't just take our word for it, see what Richard Marshall, Managing Director at Grayton Ltd had to say

"The grant has enabled us to invest in new lighting both in the workshop and site. The payback for the project is an amazing 2.5 years and the saving will be ours for the next 10 years, as the new lights have a 10 year warranty"

Read on and find out about the main energy saving measures that your business could implement, but there are many more options out there. Not sure where to start? Why not get in touch today to see how we can help you.

OUR PARTNERS

Industry leading experts in material flow management.

We are working with IfaS, The Institute of Applied Material Flow Management a not-for-profit research institute, located at the Environmental Campus, in Birkenfeld, Germany. With nearly 20 years of experience in the field of sustainable energy development and resource management, IfaS are award winning and globally recognised for their industry leading methods in zero emission technologies and material flow management. IfaS has successfully completed numerous projects in over 60 countries on five continents, helping authorities and multi-national companies, such as Continental, Procter and Gamble and Evonik Industries.

If your business is eligible you can benefit from:

- Workshops that cover energy saving topics such as heating and lighting. Eligible businesses who take part can claim a **free energy saving gift worth £500** for their business.
- **Free onsite visits** and energy report with recommendations.
- **A 38% grant** to help cover the cost of an energy saving project.
- **Advice and support** from our team of experts.

LED LIGHTS FOR THE WIN

Out with the old and in with the new. LED lights could make your business more energy efficient by up to 65 per cent!

Did you know LED lights come with many different benefits that you just might not know about.

- LED lights **last up to 5x longer** compared to fluorescent lighting, meaning that you don't have to change them as often.
- **They come in many different colours**, so depending on the mood you're going for there is the perfect lighting choice for your needs.
- They have a **short payback period**, meaning that you can save extra money that you don't spend on energy bills in no time!
- LED lights **use less energy but are brighter**, meaning that you may need less. As we say, less is more!
- **Up to 65 % on electricity savings** with a payback period of around 1- 2 years.

We can advise you on the correct LED lights for your business needs. Why not get in touch today to see how we can help you.

THE POWER OF SOLAR PV

Why not take advantage of the natural environment and use the sun as a free energy source.

Solar Photovoltaic (PV) is perfect for buildings, as it's simple and easy to install. It can be placed on vertical or horizontal spaces; making use of any empty area.

So what are the benefits to investing in solar?

- Solar PV produces electricity that can be **used in your building or fed back into the grid.**
- Solar PV is **cheaper to produce** than buying your energy from the grid.

- Solar PV is a **renewable energy source**, a nice green tick for you to be kinder to the environment.
- **Low maintenance**, could you ask for more?
- Apart from delivering electricity, the sun can provide us also with heat. If your business has a considerable demand for this, solar thermal is a **good option for the environment and your bank account.**

Have you always been interested in investing in Solar PV or other renewable solutions, but do not know where to start? Why not contact a member of the team today so we could see how solar can work for your company needs.

INTRODUCING THE ALL IN ONE BUILDING MANAGEMENT SYSTEM

Have you ever wanted
an extra pair of hands
or an assistant?

Well, the building management system is a clever piece of equipment that can control all of your energy consumption; making sure that your building is as efficient as it can be.

- You can **control the management system from your smart phone or tablet**
- **Improved safety**, as it can help to detect any problems, meaning they can be discovered sooner and resolved quicker.

- The system can be **programmed to suit your specific needs**, for example when a room reaches a certain temperature the heating is switched off.
- **Create automatic reports** so you can see the amount of energy you are consuming and where.
- On average building management systems **save between 5-10% of energy**

COULD YOUR BOILER BE DRAINING YOU OF YOUR MONEY?

**Just because your boiler
is out of sight, it doesn't
mean it has to be out
of mind!**

You could be missing out on massive energy savings through hiding an old boiler.

Making a change to a new and improved energy efficient heating system could save you money especially through the winter months.

Solutions such as a condensing boiler or heat pumps are easy to fit and will have a drastic reduction on your energy consumption. Meaning that you will need less fuel to make your office toasty.
